Projects

Hotel management system

System Description: The Hotel Management System is a comprehensive software solution designed to streamline and automate various aspects of hotel operations. This system offers a user-friendly interface and robust functionalities to meet the needs of hotel administrators, staff, and guests.

Technologies Used : php, mysql, css, bootstrap, JavaScript, jquery

Project overview:

- Admin dashboard
- Staffs management
- Guests management

- Rooms & guest Info
- Statistics

TextUtils

- **System Description:**TextUtils is a web application built with ReactJS that provides various text utility functions to manipulate text easily. Whether you need to format text, analyze its readability, or simply transform it, TextUtils has got you covered.

Tic-tac-toe

- **System Description:** The Tic-Tac-Toe game developed using JavaScript is a classic two-player game where players take turns marking spaces on a 3x3 grid. The game aims to create a winning sequence of three marks either horizontally, vertically, or diagonally. Built entirely using JavaScript, HTML, and CSS, this implementation offers a simple yet engaging user interface for players to enjoy.

Gemini Clone

- **System Description:** Gemini Clone is an AI chatbot application developed using ReactJS, aimed at providing users with an interactive conversational experience. Built upon the Gemini framework, this chatbot leverages cutting-edge AI technologies to understand user queries, provide relevant responses, and assist users with a variety of tasks.
